At LLPS, we are committed to providing a broad and balanced curriculum. In EYFS, most intended topics are taught over half a term and as appropriate prime and specific areas of learning are linked. The curriculum for each year group in Year 1 to Year 6 is arranged over a term and we aim to take a 'learning journey' within a topic, answering enquiry questions along the journey. Our intention is that each child develops a range of skills, whilst linking their knowledge and learning, to the subjects of history, geography, art, design technology and when relevant, science, computing, music, RE, PE, MFL and PSHE.

At LLPS, a termly topic model best meets our aims and is most beneficial to our children because it will:

- Enable our children to embed their knowledge, deepen their learning and make links across areas of learning;
- Ensure that our children have the opportunity to explore areas of interest and produce work of the highest quality;
- Inspire a curious mind, giving our children the opportunity to think independently and evaluate what they see and hear;
- Enable our children to thrive in the future regardless of change and challenges because they have developed the right skills and knowledge.
